 - Linguapolis Master Class: Educational Engineering

Star(t)ing point

- *Competence and performance*
What is the link between 'can do' performance statements and areas of linguistic knowledge? To what extent can or should the levels be made more explicit in terms of required vocabulary and grammar?
- *Degree of difficulty of the levels*
How can we make sure that our examinations are measuring at the CEFR levels we claim they are? What evidence do we have to support our claims?
- *Test purpose*
Why are we testing? What kind of decisions will be made on the basis of information collected via the test? What will be the consequences of these decisions?
- *Practicality*
How do we link our tests to the CEFR? How practical, applicable and operational is the CEFR for concrete language testing situations?
